PROFILE

Senior full-stack developer and team lead with 7+ years shipping production-grade web applications and enterprise SaaS platforms used by 200,000+ users. Specialize in React/Next.js frontends, Node.js/Express.js APIs, and PostgreSQL/MySQL data layers. Track record of cutting response times by 40%+, leading engineering teams of 6+, and integrating AI capabilities including RAG chatbots, YOLO-based image detection, and OCR pipelines into real-world products. Currently building client platforms at SLTech across real estate and ed-tech verticals.

EXPERIENCE

Full-Stack Developer | SLTech

Sep 2025 – Present

- Architect and deliver full-stack solutions for client projects across real estate and data integration verticals.
- Built a production RAG chatbot for REConnect using OpenAI embeddings and Chroma Cloud vector storage; system chunks source docs (pricing, MLS coverage, FAQs), retrieves the 10 most relevant chunks per query, and passes them to Claude Haiku 4.5 — enabling grounded, context-aware responses across the site widget.
- Extended REConnect chatbot with agentic capabilities: MLS provider lookups, role-aware tone adjustment, real account/plan/listing data for logged-in users, guided sign-up flows with confirmation steps, rolling conversation summaries, rate limiting, and thumbs-down retry logic.
- Built a Coolify OAuth shim (Node/Express) bridging Claude MCP with a self-hosted Coolify instance — handles OAuth on Claude's side while securely proxying a static bearer token, storing sessions in Supabase to survive redeploy, with rate limiting and consent flow protection.
- Developed the Seller Report and Client Listing modules for Brown Harris Stevens (BHS), a leading NYC residential brokerage.
- Built BHS Custom Blocks, a WordPress Gutenberg plugin with 70+ custom blocks (agent profiles, property listings, hero banners, market reports, community pages, editorial content) enabling editors to build full marketing pages without code.
- Built a custom MCP server integrated with Coolify enabling fully prompt-driven deployments, eliminating manual deployment steps across all client projects.

Senior Full-Stack Engineer | The Genius Group (TGG)

2023 – 2025

- Led delivery of 4 flagship products: Nowsign (eSignature), Premier11 (live sports), a multi-channel Booking Platform, and an AI/OCR Teacher Assistant.
- Built and deployed hundreds of high-converting marketing funnel pages using Next.js with SSR, integrated across re-engagement campaigns via email and SMS.
- Integrated Twilio and Seven67 SMS providers, Mailgun for email delivery, and Tonic and Waypoint for lead submission; set up Facebook CAPI, Google, TikTok, and Yola pixel/conversion APIs for full-funnel marketing attribution.
- Integrated Experian and Equifax UK credit report APIs and built a custom link shortener to support lead generation and tracking workflows.
- Reduced API response times by ~40% via Redis caching and query tuning; managed AWS servers including SSL setup, HTTP/2 configuration, and CI/CD pipelines with Docker and GitHub Actions.
- Built a custom internal call center management platform to streamline agent workflows, lead tracking, and campaign reporting across the sales team.
- Mentored junior engineers through code reviews, pair programming, and technical documentation.

Senior Software Engineer / Team Lead | ArhamSoft (Pvt) Ltd

2020 – 2023

- Led a team of 6 engineers delivering 4 production SaaS platforms: TheCareMD (US telemedicine), CureHotline (online doctor consultations), TeacherAI (AI-powered ed-tech), and PeopleI (HRMS) - collectively serving 200,000+ users.
- Architected multi-tenant systems with JWT auth, RBAC, and optimized PostgreSQL/MySQL schemas handling high-throughput API loads across healthcare and ed-tech verticals.
- Drove end-to-end delivery from sprint planning through production deployment, maintaining consistent release cycles across all 4 platforms over 3 years.

Software Engineer | LEAD Concept Solutions

2019 – 2020

- Delivered enterprise dashboards, real-time APIs, and admin panels using Node.js and JavaScript.
- Automated deployment workflows, reducing manual release effort and human error.
- Collaborated with product teams to define technical requirements and deliver solutions on schedule.

Backend / PHP Developer | Ranglerz Digital Marketing

2017 – 2019

- Built marketing automation tools and RESTful APIs for ad/analytics integrations on AWS.
- Developed and maintained PHP/Laravel backends powering client-facing web applications.
- Integrated third-party APIs and payment gateways to support digital marketing campaign workflows.

SELECTED PROJECTS

REConnect: Canva-integrated real estate data platform. Built RAG chatbot and multiple modules. Stack: Node.js, Next.js, OpenAI, LangChain, PostgreSQL.

NowSign: eSignature SaaS with drag-and-drop fields, legally compliant audit trails, and Stripe payments. Stack: Next.js, Node.js, PostgreSQL.

Premier11: Real-time football fantasy platform with live scoring and a WebSocket-powered data pipeline. Stack: Node.js, React, Redis, MySQL.

Booking Platform: Multi-channel property management system syncing listings across Booking.com and Airbnb. Stack: Next.js, Express.js, PostgreSQL.

Teacher Assistant: AI/OCR tool using YOLO-based image detection to extract structured data from lesson-plan images and auto-upload to Canvas LMS and VHL. Stack: Node.js, React, YOLO.

Brown Harris Stevens: Seller Report and Client Listing modules for a top NYC residential real estate brokerage. Stack: React, Node.js, PostgreSQL.

CORE COMPETENCIES

Scalable System Architecture | API Design & Integration | Performance Optimization | Redis Caching

Multi-tenant SaaS Platforms | Team Leadership & Mentoring | CI/CD Automation | Database Design

AI Integration (RAG, OCR, LLMs) | Real-time APIs & WebSockets | RBAC & Authentication | TDD & Clean Code

TECHNICAL SKILLS

Frontend: Next.js, React.js, TypeScript, JavaScript, Vue.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, GraphQL, PHP, Laravel

Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB

AI / ML: LangChain, OpenAI API, RAG systems, YOLO, TensorFlow, Python, Hugging Face

DevOps & Cloud: Docker, GitHub Actions, CI/CD, AWS, Coolify, Plesk, Git

ACHIEVEMENTS & RECOGNITION

GitHub Arctic Code Vault Contributor - Source code preserved in the GitHub Arctic Code Vault program.

GitHub Pull Shark Achievement - Recognized for significant open-source contribution activity on GitHub.

Stack Overflow Contributor - 365 reputation, 25,000+ people reached, 15 answers and 9 questions across real-world engineering topics.

Employee of the Month - Multiple Awards - Recognized multiple times across organizations for outstanding technical delivery and team contribution.

EDUCATION

B.S. Computer Science | Qarshi University, Lahore | 2013 – 2017
